**MMR INFORMATION SYSTEMS, INC. JOINS WITH LEGALZOOM TO CREATE
“MYESAFEDEPOSITBOX” FOR COPIES OF VITAL DOCUMENTS**

Los Angeles, California (April 2, 2009) – MMR Information Systems, Inc. (OTC Bulletin Board: FVRL.OB), which through its wholly-owned operating subsidiary, MyMedicalRecords, Inc. (collectively, “MMR”) provides consumer-controlled Personal Health Records (“PHRs”) (www.mymedicalrecords.com) and electronic safe deposit box storage solutions (www.myesafedepositbox.com), has entered into an agreement with LegalZoom (www.legalzoom.com), the nation's leading online legal document and filing service, to offer a “MyEsafeDepositBox” where copies of a person’s vital documents can be deposited in a virtual vault in addition to having the original document mailed to the customer.

The program will launch over the next 90 days with a special offer involving Living Will products. LegalZoom clients who purchase a Living Will can choose to have a copy of the document automatically deposited into a MyEsafeDepositBox account at no additional charge during a 90-day trial period.

“This program ties in perfectly with Legal Zoom’s objective of providing high-value, affordable legal document services,” said Robert H. Lorsch, Chairman and CEO of MMR Information Systems, Inc. “Now the client has the option to both receive his or her original documents and also store and maintain a copy in a secure online account that they can access anytime from anywhere in the world using MMR’s secure document storage systems.”

The MyEsafeDepositBox service, powered by the same technology behind MMR’s MyMedicalRecords Personal Health Record, provides a secure online virtual vault where users can store copies of all their important documents, such as insurance policies, legal papers and financial records along with vital documents such as advance directives, living wills and powers of attorney. Paper-based records can be faxed into the user’s account through a personal telephone number that is assigned to the user at the time of enrollment. Scanned documents, or images such as pictures of family or personal property, can be uploaded into the MyEsafeDepositBox account from the user’s computer desktop.

About LegalZoom.com

LegalZoom.com is the nation's leading online legal document and filing service. Co-founded by attorney Robert Shapiro in 2001, LegalZoom.com (www.legalzoom.com) offers a convenient and cost-effective way to take care of common legal needs. LegalZoom service offerings include: Wills, Living Wills, Incorporation, LLC Formation, Living Trusts, Powers of Attorney, Divorce, Small Claims, Trademarks, Patents, Copyrights and more. LegalZoom.com is not a law firm and does not provide legal advice or counsel.

About MMR Information Systems, Inc.

MMR Information Systems, Inc. (formerly Favril, Inc.), through its wholly-owned operating subsidiary, MyMedicalRecords, Inc. (collectively, “MMR”), provides secure and easy-to-use Web-based storage solutions, serving consumers, healthcare professionals, employers, insurance companies, unions and professional organizations. Seeking to empower consumers to have greater control over their health and well-being, MMR

2-2-2-2 /MMR and LegalZoom to Offer MyEsafeDepositBox for Vital Documents

facilitates access to medical records and other important documents, such as living wills, birth certificates, passports, advance directives and insurance policies, anytime from anywhere using the Internet. MMR's principal product, the MyMedicalRecords PHR service, accessed through www.mymedicalrecords.com, is built on proprietary patent-pending technology that enables users to transmit documents, images and voicemail messages in and out of the MyMedicalRecords PHR system using a variety of methods, including fax, phone, and file upload without relying on any specific electronic medical record platform to populate a user's account. Users and medical providers can fax paper records (such as laboratory tests, radiology reports and physician's notes), or scanned images can be uploaded, into a secured personal account, which the user can access and organize as necessary, including filing particularly sensitive documents in virtual lockboxes protected by secondary passwords, and designating certain records as accessible to medical personnel and first responders by way of a separate Emergency Login. MyMedicalRecords PHR also includes the Cerner Multum Drug Content database, licensed to MMR from Cerner Corp. (Nasdaq: CERN). MMR also offers its MyEsafeDepositBox service, available at www.myesafedepositbox.com, which is designed to provide secure online storage for vital financial, legal and insurance documents in addition to medical records using the same patent-pending technologies that drive the MyMedicalRecords PHR service. In its final stages of development, MMR's MyMedicalRecords Pro service is designed to give physician's offices a cost-effective solution to the expensive and time-consuming problem of digitizing paper-based medical records. MMR clients include AFL-CIO, Alexian Brothers Hospital Network, Coverdell, MedicAlert, Midwest Research Institute, Qvisory, XN Financial and others. MMR is also one of the integrated service providers that launched on Google Health. Additional information regarding MMR's business and its products, including trial accounts, is available at www.mymedicalrecords.com and www.mmrinformationssystem.com. Information on MMR's Websites is not incorporated by reference into this press release.
