

FOR IMMEDIATE RELEASE

**MMR INFORMATION SYSTEMS, INC. TO ENTER INTO DEFINITIVE AGREEMENT
WITH UNIS-TONGHE TECHNOLOGY IN CHINA**

Los Angeles, California (November 19, 2009) MMR Information Systems, Inc. (OTCBB: MMRF) ("MMR"), and Unis-Tonghe Technology (Zhengzhou) Co., Ltd ("UNIS"), announced that they will enter into a definitive agreement by the end of this year to form a joint venture to build a customized version of MMR's proprietary personal health record ("PHR") services (www.mymedicalrecords.com) and professional document imaging and management solutions in China. Luo Jianhui, Vice President and Chairman of Unisoft Group, Unis-Tonghe Technology, and Robert H. Lorsch, Chairman and CEO of MMR Information Systems, Inc., made the announcement today following meetings held last week at UNIS' corporate offices adjacent to Tsinghua University in Beijing.

UNIS is a subsidiary of Unisplendour Corporation Limited (SHE:00938) (www.unis.cn), one of China's leading IT firms employing more than 25,000 people. MMR's technology will support a UNIS medical records development project for China's 18,000 public hospital system and as many as 10,000 selected private hospitals throughout the country. China does not currently have a method of electronically acquiring, storing or transporting individual health records.

The meetings brought senior management and technology executives from MMR, UNIS and Nihilent, MMR's technology partner in India, together for a collaborative session on requirements to integrate the MyMedicalRecords Personal Health Record and MMRPro system (www.mymedicalrecordsmd.com) into a health IT platform that could be deployed throughout China's healthcare market. MMR also provides electronic safe deposit box storage solutions (www.myesafedepositbox.com) to the financial, legal and insurance industries which UNIS will help MMR introduce in China.

"China is embarking on the greatest healthcare reform in its modern history," Lorsch said. "The country will spend 180 billion RMB to create a fully electronic predictive health information network, including a Chinese version of MMR's popular Personal Health Record, integration of MMRPro and wellness tools to be available throughout the country. There are as many as 28,000 hospitals in China's 4,000 cities that do not have systems that talk to one another. By giving the Chinese population a copy of their own Personal Health Record, it helps ensure that anyone going to any hospital has the information necessary to obtain the best possible care."

MMR and UNIS are currently assembling technology and commercialization teams to assist in the necessary development and integration that will enable UNIS to launch the MyMedicalRecords platform by the 3rd quarter of next year. The agreement between MMR and UNIS will allow MMR to utilize the UNIS Cloud Computing Platform to facilitate the offering of the MyMedicalRecords PHR to the Ministry of Health and other government, financial, legal and medical entities in China.

According to Ravi Teja, who represented Nihilent at the meetings, "Nihilent will work with UNIS to utilize MMR's underlying platform to create a system that will meet the specific needs of the Chinese government. When the system is fully deployed, it will allow individuals to maintain a portable copy of their own Personal Health Record. It will also allow hospitals and doctors to track patients and disease trends regionally and throughout China.

2-2-2-2 / MMR and Unis-Tonghe Technology to Enter into Definitive Agreement

This will assist the Chinese government in reducing healthcare costs and managing disease trends such as H1N1 Influenza and the healthcare resources to contain them, including deployment of medical personnel to areas in need,” Teja added.

About MMR Information Systems, Inc.

MMR Information Systems, Inc. (MMRF.OB), through its wholly-owned operating subsidiary, MyMedicalRecords, Inc. (“MMR”), provides secure and easy-to-use online Personal Health Records (“PHRs”) and electronic safe deposit box storage solutions, serving consumers, healthcare professionals, employers, insurance companies, unions and professional organizations and affinity groups. MyMedicalRecords enables individuals and families to access their medical records and other important documents, such as birth certificates, passports, insurance policies and wills anytime from anywhere using the Internet. The MyMedicalRecords Personal Health Record is built on proprietary, patented technologies to allow documents, images and voicemail messages to be transmitted and stored in the system using a variety of methods, including fax, phone, or file upload without relying on any specific electronic medical record platform to populate a user’s account. The Company’s professional offering, MMRPro, is designed to give physicians' offices an easy and cost-effective solution to digitizing paper-based medical records and sharing them with patients in real time. MMR is an Independent Software Vendor Partner with Kodak to deliver an integrated turnkey EMR solution for small to mid-size physician practices. MMR clients include AFL-CIO, Alexian Brothers Hospital Network, Coverdell, LegalZoom, The Latino Coalition, MedicAlert, NRA, Qvisory, XN Financial and others. MMR is also an integrated service provider on Google Health. To learn more about MMR Information Systems, Inc. visit www.mmrinformationssystem.com.
