

**FOR IMMEDIATE RELEASE**

## **MMR Information Systems, Inc. to Add Ongoing and Upcoming Clinical Trials to MyMedicalRecords.com Website**

**Los Angeles, CA (November 23, 2009)** - MMR Information Systems, Inc. (MMRF. OB) (“MMR”) announced today it will add a clinical trials information service to its MyMedicalRecords Personal Health Record site, [www.mymedicalrecords.com](http://www.mymedicalrecords.com). The feature, being developed with Global Research Services, LLC (“GRS”), will enable visitors to easily find upcoming and ongoing clinical trials for patients, friends and family members who may be seeking new channels for treatment of disease. The information service will be offered as part of MMR’s secure and easy-to-use Personal Health Record (“PHR”) that provides individuals and families access to their medical records and other important documents anytime from anywhere in the world using the Internet.

Robert H. Lorsch, Chairman and CEO of MMR Information Systems, Inc., noted, “Having a Personal Health Record helps reduce medical costs and save lives. The ability to assist users in finding clinical trials adds to the value of MMR’s core product and attracts users to the Company’s website. By working with GRS to help provide pertinent and current information about locating and identifying clinical trials to fight disease, MMR Information Systems offers a valuable tool that could potentially prove beneficial to both patients and their physicians.”

Similar to the drug interaction database that MyMedicalRecords offers utilizing the Cerner Multum Drug Content Database, licensed to MMR from Cerner Corp. (Nasdaq: CERN), the clinical trials service to be operated in conjunction with Global Research Services brings with it a full-service clinical trials management organization. GRS, headquartered in Rockville, Maryland with offices in Canada, Europe and Asia, is already partnering with the Company to bring its anti-CD20 monoclonal antibodies to market. The Company’s anti-CD20 antibody asset, under patent protection until 2027, is potentially a candidate for the treatment of a variety of conditions known to be influenced by anti-CD20.

### **About MMR Information Systems, Inc.**

MMR Information Systems, Inc. (MMRF.OB), through its wholly-owned operating subsidiary, MyMedicalRecords, Inc. (“MMR”), provides an electronic safe deposit box storage solutions, serving consumers, healthcare professionals, employers, insurance companies, unions and professional organizations and affinity groups. MyMedicalRecords enables individuals and families to access their medical records and other important documents, such as birth certificates, passports, insurance policies and wills anytime from anywhere using the Internet. The MyMedicalRecords Personal Health Record is built on proprietary, patented technologies to allow documents, images and voicemail messages to be transmitted and stored in the system using a variety of methods, including fax, phone, or file upload without relying on any specific electronic medical record platform to populate a user’s account. The

2/2/2/2

Company's professional offering, MMRPro, is designed to give physicians' offices an easy and cost-effective solution to digitizing paper-based medical records and sharing them with patients in real time. MMR is an Independent Software Vendor Partner with Kodak to deliver an integrated turnkey EMR solution for small to mid-size physician practices. MMR clients include AFL-CIO, Alexian Brothers Hospital Network, Coverdell, LegalZoom, The Latino Coalition, MedicAlert, NRA, Qvisory, XN Financial and others. MMR is also an integrated service provider on Google Health. To learn more about MMR Information Systems, Inc. visit [www.mmrinformationssystem.com](http://www.mmrinformationssystem.com).

### Forward-Looking Statement

Statements in this press release that are not strictly historical in nature constitute "forward-looking statements." Such statements include, but are not limited to, statements regarding the Company's anti-CD20 antibody assets. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results to be materially different from historical results or from any results expressed or implied by such forward-looking statements. These factors include, but are not limited to, risks and uncertainties related to the development and approval of biotechnology product candidates and additional risks discussed in the Company's filings with the Securities and Exchange Commission. All subsequent written and oral forward-looking statements attributable to the Company (or any person acting on the Company's behalf) are qualified by the cautionary statements in this notice. MMR Information Systems, Inc. is providing this information as of the date of this release and, except as required by law, does not undertake any obligation to update any forward-looking statements contained in this release as a result of new information, future events or otherwise.
