**KODAK SIGNS ELECTRONIC HEALTH RECORD SOLUTIONS PROVIDER
MMR INFORMATION SYSTEMS, INC. AS INDEPENDENT SOFTWARE VENDOR (ISV)**

**MMR Will Offer KODAK Document Imaging Products as Part of
Web-based Personal Health Record Solutions**

LOS ANGELES and ROCHESTER, N.Y., August 20, 2009—A new independent software vendor (ISV) agreement between Kodak and MyMedicalRecords, Inc. (MMR), a subsidiary of MMR Information Systems, Inc. (MMRF.ob), will enhance how doctors provide electronic patient information online. KODAK Scanners and KODAK Capture Pro Software will work seamlessly with the MMRPro System and Personal Health Records (PHR) products. Together, these technologies help healthcare professionals lower the cost and increase the efficiency of digitally capturing and managing information from paper-based medical files.

Improved digital records management represents a top priority of the American Recovery and Reinvestment Act of 2009, signed into law by President Barack Obama in February. MMR assists healthcare professionals in search of effective electronic document management solutions. The MyMedicalRecords consumer-controlled multilingual Personal Health Record, available at www.mymedicalrecords.com, streamlines the process of sharing health information between doctors and their patients. To date, more than 500,000 users have access to MMR's PHR product network.

Kodak's document capture software and scanners couple performance and ease of use to enhance the accuracy and efficiency of processing high quality images from paper-based documents. These precision-driven document capture capabilities will allow healthcare professionals to upload and access patient information in real-time using MMR's Web-based, Software-as-a-Service (SaaS) applications, including mymedicalrecordsmd.com, mmrpatientview.com and mymedicalrecords.com. This feature also enables doctors and patients to manage and access records securely from any Internet connection anytime from anywhere in the world.

"Utilizing Kodak product furthers our commitment to develop professional services that will improve the quality of patient care," said Robert H. Lorsch, Chairman and CEO of MMR Information Systems, Inc. "Developed specifically for today's changing healthcare demands, the features in our Professional and Patient directed PHR products are built on proprietary patent pending technologies and are designed to enable both physicians and their patients to more easily access and share medical records with significant emphasis on meaningful use."

MMR's portfolio of products is designed to help medical professionals and healthcare consumers securely control the use of patient health information. Customizable settings allow doctors and their staff to manage access permissions and handle changes via e-mail or telephone. MMR will also utilize Kodak's document capture technology, including KODAK Capture Pro Software, to help streamline data capture from multiple providers. In addition, medical records can also be easily uploaded, faxed or dictated in MMR's MyMedicalRecords Pro and MyMedicalRecords PHR products. Professionals and patients can easily view or print selected uploaded health information in the event of an emergency through MMR's proprietary Emergency View.

2-2-2-2 / MMR and KODAK Announcement

“Kodak works with ISVs serving many industries. Healthcare focused ISVs such as MMR advance how doctors can integrate paper-based medical health information within digital systems and more easily provide information to healthcare consumers via solutions such as MyMedicalRecords PHR,” said Don McMahan, Regional Business Manager and Vice President Sales, US&C, Document Imaging, Business Solutions and Services, Eastman Kodak Company. “MMR’s rapidly growing membership will significantly help to spread the adoption of these critical technology solutions for healthcare.”

KODAK Products are backed by KODAK Service and Support. KODAK Service and Support is made up of more than 3,000 professionals reaching more than 120 countries. It is a leading multi-vendor integrated services provider, delivering consulting, installation, maintenance and support services for the commercial printing, graphic communications, document imaging and data storage industries. KODAK Service and Support professionals are uniquely qualified to provide services that control costs, maximize productivity, and minimize business risk.

About MMR Information Systems, Inc.

MMR Information Systems, Inc.,(MMRF.ob) through its wholly-owned operating subsidiary, MyMedicalRecords, Inc. (“MMR”), provides secure and easy-to-use online Personal Health Records (“PHRs”) and electronic safe deposit box storage solutions, serving consumers, healthcare professionals, employers, insurance companies, unions and professional organizations. MyMedicalRecords enables individuals and their families to access their medical records and other important documents, -- such as birth certificates, passports, insurance policies and wills -- anytime from anywhere using the Internet.

The MyMedicalRecords PHR service, accessed through www.mymedicalrecords.com, allows documents, images and voicemail messages to be transmitted and stored in the MyMedicalRecords PHR system using a variety of methods, including fax, phone, or file upload without relying on any specific electronic medical record platform.

The proprietary MyEsafeDepositBox service, available at www.myesafedepositbox.com, provides secure online storage for vital financial, legal and insurance documents in addition to medical records, and serves as a powerful emergency preparedness tool for industry, individuals and municipalities.

Information about the MyMedicalRecords Pro service, designed to give physicians' offices an easy and cost-effective solution to digitizing paper-based medical records, is available at www.mymedicalrecordsmd.com.
