MMR Information Systems, Inc. Completes Joint Venture Agreement with Unis-Tonghe Technology, a Division of Tsinghua Holdings in China

LOS ANGELES, CA - (January 4, 2010) - [MMR Information Systems, Inc.](#) (OTC.BB:MMRF - News) ("MMR") and [Unis-Tonghe Technology \(Zhengzhou\) Co., Ltd.](#) ("UNIS"), confirmed today that they have signed a definitive Joint Venture Agreement to deploy a customized version of MMR's MyMedicalRecords proprietary Personal Health Record ("PHR") services and MMRPro professional document imaging and management solutions in China. UNIS, a subsidiary of Unisplendour Corporation Limited (SHE: 00938) (www.unis.cn), and a division of Tsinghua Holdings Co., Ltd., is one of China's leading IT firms, employing more than 25,000 people.

Luo Jianhui, Vice President and Chairman of Unisoft Group, Unis-Tonghe Technology, and Robert H. Lorsch, Chairman and Chief Executive Officer of MMR Information Systems, Inc., made the announcement. The Joint Venture, working with [Nihilent](#), MMR's technology partner in India, will integrate the MyMedicalRecords PHR (www.mymedicalrecords.com) and MMRPro system (www.mymedicalrecordsmd.com) into an EMR health IT platform to be used in China's vast healthcare market. MMR also plans to work with UNIS to ultimately provide electronic safe deposit box storage solutions based on its MyEsafeDepositBox (www.myesafedepositbox.com) to the financial, legal and insurance industries, which UNIS will help MMR introduce in China.

UNIS intends to launch the MyMedicalRecords technology platform along with a Chinese Electronic Medical Records ("EMR") system using MMR and UNIS technology in support of a massive UNIS medical records development project for China's 18,000 public hospital system, which will also be offered to as many as 10,000 private hospitals throughout the country. China does not currently have a method of electronically acquiring, storing or transporting individual health records.

According to MMR CEO Robert H. Lorsch, "The Chinese version of MMR's popular Personal Health Record, plus integration of MMRPro into a Chinese EMR system, will benefit Chinese citizens by providing them access to copies of their own personal health information. Currently, the Chinese population has very limited access so clearly this solution will make it easier to share medical records throughout the public and private Chinese hospital system, which has not been easily done in the past. By enabling hospitals and doctors to share a patient's health history utilizing existing medical records, the best possible care can be provided while reducing medical costs to individuals and the government."

China's hospitals, located in over 4,000 cities, are not connected electronically. MMR and UNIS' technology and commercialization teams will employ UNIS' Cloud Computing Platforms in operating MyMedicalRecords systems in conjunction with the Ministry of Health and other government, financial, legal and medical entities in China in an effort to bring health care into a unified network to benefit patients.

About MMR Information Systems, Inc.

MMR Information Systems, Inc. (OTC.BB: [MMRF - News](#)), through its wholly-owned operating subsidiary, MyMedicalRecords, Inc. ("MMR"), provides secure and easy-to-use online Personal Health Records ("PHRs") and electronic safe deposit box storage solutions, serving consumers, healthcare professionals, employers, insurance companies, unions and professional organizations and affinity groups. MyMedicalRecords enables individuals and families to access their medical records and other important documents, such as birth certificates, passports, insurance policies and wills anytime from anywhere using the Internet. The MyMedicalRecords Personal Health Record is built on proprietary, patented technologies to allow documents, images and voicemail messages to be transmitted and stored in the system using a variety of methods, including fax, phone, or file upload without relying on any specific electronic medical record platform to populate a user's account. The Company's professional offering, MMRPro, is designed to give physicians' offices an easy and cost-effective solution to digitizing paper-based medical records and sharing them with patients in real time. MMR is an Independent Software Vendor Partner with Kodak to deliver an integrated turnkey EMR solution for small to mid-size physician practices. MMR clients include AFL-CIO, Alexian Brothers Hospital Network, Coverdell, LegalZoom, The Latino Coalition, MedicAlert, NRA, Qvisory, XN Financial and others. MMR is also an integrated service provider on Google Health. To learn more about MMR Information Systems, Inc. visit www.mmrinformationssystem.com.
